

Banff women's hybrid insulated jacket

SKU: TP239332

Categorie: Clothing

The Banff women's hybrid insulated jacket – a perfect fusion of style and performance. The inner stormflap ensures that the wind does not come through the jacket, and the dropped back hem adds an extra touch of coverage for added warmth. The elasticated binding in a contrasting colour adds a stylish accent while ensuring a secure fit. The jacket's dull cire 380T woven fabric has a water repellent and downproof finish, made of nylon (38 g/m²). The contrast fabric is an interlock knit made of polyester and elastane (245 g/m²), adding flexibility and comfort. The fake down insulation of polyester provides lightweight warmth, perfect for chilly days. This jacket is designed with a fitted shape for a feminine look.
